

## DAYDOTS KENYA LTD SAFETY AND SECURITY MEASURES

Safety and security at Daydots Kenya Ltd are not optional; they are fundamental to our operation. We believe in proactive measures that protect our employees, assets, and digital resources. We are committed to ensuring that our workplace is a safe and secure environment, and we take every step necessary to achieve this.

Here are some of the essential safety and security measures we have implemented:

### 1. Comprehensive Monitoring and Surveillance

At Daydots Kenya Ltd, we employ advanced security technology to monitor and safeguard our premises. Our authentication system includes smart card access, biometric checks, and commemorative measures, ensuring that only authorized personnel can enter our facilities. Motion detection technology and video surveillance cameras are strategically placed to enhance monitoring and surveillance.

### 2. Emergency Escape Plan

In the face of unexpected dangers, we have a well-structured safety emergency plan that addresses various contingencies. This plan includes safe evacuation procedures to ensure the well-being of our employees during emergencies. We make sure that all our employees are well-informed about the emergency plan, enabling them to act swiftly and efficiently when necessary. Our workplace is equipped with essential emergency and medical kits, such as fire extinguishers and first aid boxes, and our employees are trained in their proper use.

### 3. Cybersecurity

In the digital age, cybersecurity is as crucial as physical security. We recognize the growing threat of cybercrimes and take proactive measures to protect our digital assets. Daydots Kenya Ltd employs the services of cybersecurity experts to monitor and secure our digital devices, detect and prevent phishing attacks, malware, and viruses. We enforce strong password policies and maintain strict confidentiality for highly sensitive digital data. Firewalls are utilized to regulate network traffic, both internally and externally, and all our data is securely encrypted.

### 4. Secure Passwords and Authentication

To protect any personal information stored on our network, we enforce strong authentication procedures and sensible password practices to ensure that only authorized individuals can access sensitive data.

### 5. Professional Security Personnel

For effective security control, Daydots Kenya Ltd has engaged the services of professional security personnel. Our security guards are not just gatekeepers; they are well-trained experts responsible for implementing our security protocols. We believe in having a dedicated team that ensures the safety and security of our premises and our workforce.

**Safety and security are paramount at Daydots Kenya Ltd. We believe in taking a proactive approach to safeguard our employees, assets, and digital resources. Our commitment to these safety and security measures ensures a productive and secure work environment, ultimately benefiting our employees, clients, and the longevity of our business.**
